

ETEBMS-2017

3rdInternational Conference on
**“Emerging Technologies in Engineering, Biomedical, Management and
Science [ETEBMS-2017]”**

9 July 2017, Jodhpur (Raj.) INDIA

Venue : Jodhpur, Rajasthan, INDIA

Website : sdtechnocrates.com

E-mail : sdtechnocrates@gmail.com

Welcome Note

It gives us great pleasure to extend to you all a very warm welcome on behalf of the SD Technocrats & ETEBMS and to say how grateful we are to Dr. G. Shrinivasan, Intell C.O.E. Anantpur & Prof. Amarnath, SRIT Anantpur who have accepted our invitation to convene this International Conference on the Emerging Technologies in Engineering Biomedical and Science , here in Jodhpur.

It is an opportune time to rediscover knowledge and discuss problems of mutual interest with delegates different Region. It is gratifying to note that the agenda of the international conference covers a wide range of very interesting items relating to the Engineering, Biomedical, Management & Science.

We are aware of the tremendous effort made, and the large investment in funds and scientific effort by a number of member countries in Engineering, Biomedical,. We wish them every success in their noble endeavours to develop their technological resources and increase Technical production. We are only too anxious to hear our distinguished colleagues on their recent research developments in the field of Engineering & Science. No matter how much we can do by ourselves on the national level, whether it be research or development, it is never enough. In a spirit of true cooperation, we in this region of the world., proud of nurturing all past and present civilizations and cultures, must join in an action-oriented effort to attack and solve the problems that beset all technologies.

If on the International level we can, and must, pursue technological development as a multi-dimensional concept, encompassing the economic, social, institutional and physical elements of development, in a wider sense, it would be relatively easy to effect the necessary adjustments for a truly effective cooperation on the regional basis. This is fully consonant with our official position taken and the full support of the concept of international technological adjustment at the recent ETEBMS Conference.

In concluding, I wish you every success in your research and make nation and your technology at international level. Thank you.
